

RōM 30' – 900 Series

Built to Last & Finish First

The RōM Stacker is our premium stacker car hauler, and we've loaded it with the features you need most. The chassis is fully welded, using state-of-the-art weld tables that ensure precision alignment of all support members. It's the optimal way to transport your treasured racing vehicles, classic collectibles or weekend toys.

RACE WITH THE BEST

This RōM model was designed with serious automotive racing in mind. Our 18' tilt-deck lift provides better lifting capability (21' or more) for longer cars with wheelie bars, and the ramp door is designed with a longer transition flap to assist in loading low-profile cars. Because visibility is essential, we've added scene lighting on the side and rear. Packed with features, this model also includes a 50 amp breaker box, interior/external outlets, a battery charger, and a hydraulic jack with ATP tongue cover.

Details at ATCtrailers.com

STANDARD ON ALL STACKER MODELS:

- All-aluminum chassis for lightweight towing.
- Best lift on the market; aluminum tilt deck with integrated airline tie-down track.
- Welded front attic storage loft.
- All-aluminum cabinetry, ceiling, and wall covering.
- Hardwired for back-up camera.

(See reverse side for a complete list of features and options.)
